

Hello world !

A brief test of \LaTeX to see if my installation is working –

Let's start with what is hopefully only a few lines of random writing, before I let Lorem Ipsum loose to fill up most of the rest of this silly page. This part should have a ragged line ending, but with only a short piece of text it can be hard to tell.

Here, the text should be “normal”, i.e. lined up on both the left and right margins, but with indented first lines in each paragraph and short last lines if necessary. \TeX is often used for setting mathematical formulae, that part will be centred. And the cod latin in the subsequent paragraphs will be doublespaced.

The quadratic formula is

$$\frac{-b \pm \sqrt{b^2 - 4ac}}{2a}$$

90% of what I find in online tutorials doesn't work for me.
How will I ever get my Doctorum Adamus con Flabello Dulci ?
